NOTICE

COMPLIANCE WITH OCD PRODUCTION REPORTING REQUIREMENTS

Effective October 14, 2020

Pursuant to OCD Rule 19.15.7.24 NMAC, Operators are required to file monthly production reports via the OCD's online form C-115. Failure to timely report may result in sanctions including, but not limited to, cancellation of an operator's authority to transport or inject.

The OCD has identified many operators that have failed to timely file C-115 reports. Timely C-115 reporting is crucial for oil and gas production accounting for the State of New Mexico. The OCD will be engaging operators and pursuing enforcement actions as necessary to ensure timely C-115 reporting.

Operators are encouraged to contact Daniel Sanchez, OCD Administration and Compliance Manager, if they believe that they are out of compliance or have questions as to how to comply, at (505) 795-4558 or daniel.sanchez@state.nm.us.
